PROFESSIONAL SUMMARY

Computer Science undergraduate at the University of Mumbai with strong hands-on experience building full-stack web applications, AI-enabled platforms, RESTful APIs, and distributed backend systems. Skilled across React.js, TypeScript, Node.js, Java Spring Boot, PostgreSQL, MongoDB, Prisma, Docker, Git/GitHub, Linux, and cloud deployment workflows. Experienced through project-based development in microservices, authentication, payment integration, asynchronous messaging with RabbitMQ, responsive UI engineering, and AI-powered application features. Seeking internships or entry-level opportunities in Full Stack Development, AI Engineering, Backend Engineering, or DevOps where I can contribute to production-minded software while continuing to grow in modern engineering practices.

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+), TypeScript, Python, C, C++

Frontend: React.js, Next.js, Vite, HTML5, CSS3, Tailwind CSS, Responsive UI

Backend: Node.js, Express.js, Java Spring Boot, Spring REST, RESTful APIs, Microservices

Databases: PostgreSQL, MongoDB, MySQL/MariaDB, Prisma ORM

AI & APIs: OpenAI API, Gemini API, Claude API, AI chatbot/application integration, API integration

DevOps & Cloud: Docker, Linux, Git, GitHub, GitHub Actions, AWS EC2, Nginx, Vercel, CI/CD fundamentals

Messaging & Security: RabbitMQ, JWT, OAuth2, Keycloak, WebSockets, secure API practices

Payments & Integration: Razorpay, Stripe, Google APIs, third-party REST API integration

Tools: VS Code, Postman, npm, Maven, Git workflows, Prisma CLI

SELECTED PROJECTS

Salon Booking System | Java Spring Boot • React • Microservices

Architected a full-stack salon booking platform using Java Spring Boot microservices and React.js with Tailwind CSS.

- Implemented service-oriented backend architecture with API Gateway and service discovery patterns for scalable communication.
- Built booking, salon/service management, authentication, reviews/ratings, notifications, and payment-oriented workflows.
- Integrated RabbitMQ for asynchronous, event-driven communication between services and WebSockets for real-time notifications.
- Implemented JWT/OAuth2-based security with Keycloak and integrated Razorpay and Stripe payment workflows.
- Containerized services with Docker and applied Git, Linux, API testing, and deployment practices.

Square AI Platform | Node.js • React • PostgreSQL

Built an AI-focused web platform with a modern React/Tailwind frontend and Node.js backend.

- Designed RESTful backend APIs with Node.js/Express and PostgreSQL persistence using Prisma ORM.
- Integrated AI APIs to support intelligent application features and conversational/automation workflows.
- Implemented structured data models, authentication-ready backend architecture, API validation, and frontend-backend integration.
- Developed a responsive UI with React.js, Tailwind CSS, and reusable components.

E-Commerce Web Application | MERN Stack

Developed a complete e-commerce application using MongoDB, Express.js, React.js, and Node.js.

- Implemented product, category, user, cart, and administrative workflows with CRUD-based REST APIs.
- Built responsive React interfaces and connected them to backend services and database operations.
- Applied authentication, API testing, Git version control, and practical full-stack debugging.

Khmer Career AI Platform | Spring Boot Microservices • React + TypeScript • PostgreSQL

Developed a career-focused platform combining modern web engineering with AI-oriented functionality.

- Designed a microservices-oriented backend using Java Spring Boot with PostgreSQL and a React + TypeScript frontend.
- Implemented modular service boundaries, RESTful communication, data persistence, and frontend integration.
- Focused on career-related workflows and AI-assisted functionality while strengthening practical system-design fundamentals.

Personal Portfolio Website | React.js • Vercel

Built and deployed a responsive personal portfolio using React.js to present projects, technical skills, and professional work.

- Implemented reusable UI components and responsive layouts for desktop and mobile experiences.
- Deployed the application on Vercel and practiced Git/GitHub-based source control and modern frontend delivery.

DEVOPS & ENGINEERING PRACTICES

- Containerization with Docker and practical understanding of multi-service application environments.
- Linux command-line usage, environment configuration, application troubleshooting, and deployment fundamentals.
- Git/GitHub workflows including repositories, branching, commits, remote management, and collaborative development practices.
- Exposure to CI/CD concepts with GitHub Actions, reverse proxy/deployment concepts with Nginx, and cloud deployment using AWS/Vercel.
- Hands-on experience diagnosing integration issues across databases, ORMs, APIs, authentication, and distributed services.

EDUCATION

Bachelor of Science / Bachelor's Degree in Computer Science — University of Mumbai, Mumbai, India

Currently in 3rd Year | International Student | Expected Graduation: [Year]

CORE STRENGTHS

- Strong problem-solving mindset with hands-on debugging and project implementation experience.
- Able to learn new frameworks, APIs, infrastructure tools, and engineering patterns quickly through practical development.
- Strong foundation across frontend, backend, databases, APIs, AI integration, and DevOps fundamentals.
- Comfortable working on end-to-end features from UI and API design to database integration and deployment.
- Growth-oriented Computer Science student focused on building production-ready software with modern technologies.

CAREER FOCUS

Target roles: Full Stack Developer Intern / Junior Full Stack Developer, Backend Developer, AI Engineer Intern / Junior AI Engineer, Software Engineer, or DevOps Engineer Intern.
